

Broadcast Quality Studio Production and Web Casting in Washington, D.C.

WELCOME TO TEAM STUDIO

Our 1,500 sq. ft space houses a 30' x 50' studio, with a 15'x 11' corner hard cyc, designed to accommodate news and magazine style programs, interviews, CEO/corporate presentations, roundtable discussions, media training and web-based content. Fully equipped for HD and SD, the studio provides a state-of-the-art, cost-effective solution for your media production needs.

Adjacent to the studio, the fully outfitted control room is ready to take the studio live for network broadcasts or switched programming for live-to-tape recording. Content can be immediately encoded to stream live or uploaded to your corporate or network website.

Following image capture, Team's award winning post-production staff can composite green screen shots, design, edit and color correct footage, then add the right music, sound effects and mix for a perfectly polished program. Our proficient operations staff will organize all your deliverables and ensure your project is completed on time and within budget.
